example code of each programming lang

Here's a simple "Hello, World!" example in many popular programming languages, showcasing the syntax style and structure of each one. Let me know if you want examples of more complex programs.

```
c
#include <stdio.h>

int main() {
    printf("Hello, World!\n");
    return 0;
}
```

```
cpp
#include <iostream>

int main() {
    std::cout << "Hello, World!" << std::endl;
    return 0;
}
```

```
java
public class HelloWorld {
    public static void main(String[] args) {
        System.out.println("Hello, World!");
    }
}
```

```
python
print("Hello, World!")
```

```
javascript
console.log("Hello, World!");
```

```
ruby
puts "Hello, World!"
```

```
php
<?php
echo "Hello, World!";
?>
```

```
html
<!DOCTYPE html>
<html>
  <body>
    <h1>Hello, World!</h1>
  </body>
</html>
```

```
css
body {
  font-family: Arial;
  color: blue;
}
```

```
jsx
import React from 'react';

function App() {
  return <h1>Hello, World!</h1>;
}

export default App;
```

```
dart
import 'package:flutter/material.dart';

void main() => runApp(MyApp());

class MyApp extends StatelessWidget {
  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      home: Scaffold(
        body: Center(child: Text('Hello, World!')),
      ),
    );
  }
}
```

```
}  
}
```

```
rust  
fn main() {  
    println!("Hello, World!");  
}
```

```
go  
package main  
  
import "fmt"  
  
func main() {  
    fmt.Println("Hello, World!")  
}
```

```
haskell  
main = putStrLn "Hello, World!"
```

```
bash  
echo "Hello, World!"
```

```
powershell  
Write-Output "Hello, World!"
```

Would you like examples in:

- Assembly
- Kotlin / Swift
- SQL
- R / MATLAB
- TypeScript
- Or another?

Let me know your needs (e.g., beginner-friendly, backend, data science, etc.) and I can tailor the examples!
